How do I complete this project?

NOTE: If you are submitting before **October 18th**, 2015, your project must compile in either**Xcode 6.4 and Swift 1.2** or **Xcode 7 and Swift 2.0**. After this date, submitted projects must compile in Xcode's most up-to-date, **stable** release: Xcode 7.

1. Read the project specification and/or download an example of the app.
2. Review the grading rubric to see how your project will be assessed. All criteria must "meet specifications" in order to pass.
3. If desired, download a collection of images used in the app. These can be found in the**Downloadables** section below.
4. If necessary, take Intro to iOS App Development with Swift, which walks you step-by-step through creating the Pitch Perfect App.
5. Once you have a completed app, make the following changes to your code, based on feedback from a professional iOS Developer.

Submission

Check your project for completion

Before submitting your project for evaluation, we recommend that you check that each of the following is true:

- Your app compiles & runs as expected
- You are proud of your app and its output
- You completed your project according to the instructions
- You made the following improvements to your code
- You checked your project against the rubric

Submit your project

When you're ready to submit your project, click here and follow the instructions. If you are having any problems submitting your project please email us at **ios-project@udacity.com**.
